Programme Details

Magnification and Microsurgery is the future of Periodontal Surgery and redefines precision dentistry. It entails disappearing incisions, rapid anastomosis, healing and suture removal within 3 days.

Keeping pace with the moving trends on a global scale the following lectures by our eminent speakers will provide us with a glimpse of how we can improve our understanding and knowledge of these topics and procedures.

Lecture 1

CONTEMPORARY SOFT TISSUE MANAGEMENT IN PERIODONTAL SURGERY: FROM ROOT COVERAGE TO PERI-IMPLANT TISSUE AUGMENTATION - DR. MEENU TANEJA BHASIN

The in-depth lecture will include

- CTG harvesting protocols
- De-epithelized CTG (Zucchelli method)
- Coronally Advanced Flap for Single and Multiple tooth recession
- Tunneling technique
- VISTA technique

Lecture 2

ROLE OF MAGNIFICATION IN MICROSURGERY AND IMPLANT THERAPY -DR. RASHMI HEGDE

There will be a detailed lecture where participants will learn about

- Basics of Loupes and Operating Microscope
- Clinical applications and use of magnification in NSPT and periodontal microsurgery
- Redefining concepts of GTR eliminating use of membranes
- Pinhole surgical technique for root coverage
- Single incision technique harvesting CTG for soft tissue augmentation
- Implant microsurgery
