CLINICAL RESEARCH
TRAINING OF TEACHERS

The aim of Master of Dental Surgery course in India is to train a graduate as a specialist clinician, a researcher and a teacher; but more emphasis is placed now in the curriculum on clinical practice rather than teaching. Teaching is a science based on empirical evidence. It is a learnable skill rather than an inherent quality you are born with. Unfortunately, the dental teachers in our country are not formally trained in the concepts and principles of teaching and learning.

Teaching is a pleasurable and self-fulfilling activity and it could be made more fruitful and enjoyable by understanding the science behind it. It is now universally accepted that the dental teacher should be trained in basic educational methods and be equipped with pedagogical skills and competence.

Indian Society of Periodontology, which has realised this fact, has resolved to conduct Training of Teachers Program in different parts of the country for the benefit of the teachers engaged in teaching periodontology.

The program which acquaints the teachers with basics of curriculum development, teaching and assessment methods is a rigorous training program scheduled to be held on the 20th, 21st & 22nd June 2014 at Bangalore and 15th & 16th September 2014 at Lucknow for the post graduate teachers in periodontology in the country. We request you to take benefit of this wonderful opportunity and hone your teaching skills and benefit the young and budding academicians training under you.

This program is for a select group of 50 ISP life members and who are preferably from postgraduate teaching institutes and are new postgraduate teachers and are actively involved in academics. The program does not attract any registration or course fee. The members are requested to register their names at the earliest. The registration would be on first come first serve basis.

Dr. Ashish Jain
President

Dr. Balaji Manohar
Secretary

Dr. Mohd. Fazaluddin
Program Co-ordinator
